

John Bielby P. Eng.

A results-oriented manufacturing executive with experience in both smaller privately-owned and large, internationally managed operations, serving both local and global customers. John has driven business turnarounds, successfully grown businesses organically, and managed the integration of merged companies. He combines his comfort on the shop floor with his confidence in the Boardroom to enable good strategy to carry a business forward. His expertise in bringing together the strength of the enterprise team and his own well-honed analytical skills and inclusive style, delivers early positive improvements in every situation he takes on.

SELECTED ACHIEVEMENTS

- Successfully led business turnaround at a number of manufacturing operations by restructuring management, applying rigorous operational metrics and rebuilding marketing and sales capabilities.
- Built and executed successful business succession, including value improvement and sale of business
- Doubled sales and tripled profits at a single site operation by installing focussed teams to resolve chronic operating issues and re-orienting the product and marketing strategy to expand aggressively into the US.
- Reduced operating costs by 30 % and inventories by 35 % during a period of severe market downturn enabling operations to continue in positive cash flow territory despite significantly reduced revenues.
- Managed the successful integration of two merged North American manufacturers, rationalizing product and marketing responsibilities, as well as optimizing manufacturing facilities resulting in the anticipated business synergy.
