

David Rankin, P. Eng

Operations & Project Management

A results oriented and collaborative project management leader with a multi-national and multi-sector operations background. David's customer stewardship and clear thinking brings order to chaos and focuses on stakeholder relationship management. A successful project manager and team builder, he facilitates quality and business services improvement across disciplines and is comfortable in all business settings.

SELECTED ACHIEVEMENTS

- Led a large operations portfolio comprised of independent ancillary and service unit businesses valued at 100M\$ in annual revenue while improving – Net operating Income, customer experience and generating annual expense savings in excess of 25M\$ annually.
- Led Board “governance improvement” projects at several large public sector organizations. Project management and facilitative leadership skills were used to assess, develop and coach change in board structure, membership and operating discipline to improve board performance and engagement.
- Led large capital projects for Dow Chemical during its \$450MM Alberta Canada world scale facility startup and operation. Projects included new production line equipment design, installation and commissioning, meeting cost and product quality and schedule requirements.
- Responsible for rebuilding UBC safety & security organization and implementing new operating discipline and programs to meet community policing and VANOC 2010 Olympic security goals
- Facilitated security integration improvements with national and regional policing agencies to support municipal policing requirements.
- Won North American recognition for a large multi-national company's customer service, quality systems and business technologies implementation (SAP).
- Transformed the financial and product distribution performance of a large multi-national company while building organization sustainability. Introduced staff performance management and product stewardship programs to build corporate accountability.
