

David E. Yundt

Business Transformation, Supply Chain, Operations

David is an experienced CEO and board member with a track record of successfully leading organizations through transformational change. His expertise includes start-ups, mergers and acquisitions, and complex operating organizations in both the private and not-for-profit sectors.

His breadth and depth of experience includes supply chain, shared services, health care, consumer products, third party logistics, retail distribution, and pharmaceuticals.

SELECTED ACHIEVEMENTS

- Led the start-up and transformation of Plexxus, creating a leading Canadian supply chain and back office shared services organization providing services to Ontario hospitals and the Ontario health system. Scope of the transformation included:
 - modernization and consolidation of procurement practices for \$1.5 billion in annual spend, resulting in cumulative savings of over \$300 million
 - implementation of a common technology platform (SAP, Ariba and Allscripts) across 20 hospitals, 33 legal entities and 13,200 users
 - centralization of accounts payable and purchasing management activities resulting in operational efficiencies and improved service levels
 - integration of another shared service organization resulting in 40% growth
- Led the start-up of Hospital Logistics Inc., providing logistics services and just-in-time distribution of medical supplies and equipment to hospitals, with service levels of over 99.5%
- Led national distribution operations for McKesson, the largest pharmaceutical distributor in Canada, during a phase of 300% growth that included several acquisitions
- Led operations in the start-up of Progistix-Solutions Inc. (an SCI company), a leading third-party logistics outsourcing provider for companies requiring sophisticated field service logistics
- Led operations in the start-up of the Canadian Pharmaceutical Distribution Network (CPDN), a leading distribution channel to Canadian hospitals, resulting in efficiencies and reduced costs to manufacturers, and improved service levels for customers
